### **DETAILED ACTION**

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Throughout the claims, phrases such as "head of", "mechanism of", "unit of", etc., should be --head for--, --mechanism for--, --unit for--, etc. Claim 10, "an robot" should be --a robot--.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by USPN 4,578,554 to Coulter. The robot described by Coulter comprises a YAG laser (column 4, last paragraph) and comprises holding-turning mechanisms which meet applicant's claimed structure. Note the intended use limitations in applicant's claims pertaining to "the weld line" do not impart patentable weight to the claimed structure.

#### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art pertains to laser robots.
